

**To: All Great West Resources Employees**

**Re: 2008 - SAFETY Achievements**

As you know Safety is a core principle at Great West Resources. Our Safety Policy states:

***“GWR is committed to conducting our business in a way that protects the health and safety of our employees, our operations, customers and the general public”.***

With that in mind we would like to take this opportunity to thank all the employees at GWR as well as our contractors for their cooperation and commitment to safety in 2008 and the achievement of ZERO Incidents. Your dedication to our safety program resulted in GWR achieving an excellent score during our COR (Certificate of Recognition) Safety Audit.

In 2009 we have established the following safety goals;

1. Zero loss time accidents on all project sites for calendar year 2009.
2. Ensure zero Motor Vehicle Accidents or claims on all project sites for calendar year 2009.
3. All senior managers & supervisors to attend a company sponsored accident investigation course.
4. Identify site/project hazards and develop action plans to ensure all hazards are addressed.

Observing and recording hazards on project sites is the first step in ensuring a safe workplace. Utilizing the company hazard assessment program and ensuring that action plans are developed to address any reported hazards will achieve the above goal. During 2009 Bill Thompson will be working with GWR Supervisors and Operators in developing action plans to ensure all hazards identified in the field are addressed.

Once again thank you for your commitment to safety and please continue to perform your daily job functions in a safe and responsible manner.

Steve Denne
